## **CONVENIENCE**

Each season Expert Heating & Cooling will contact you to schedule your inspections.

## **PEACE OF MIND**

Let Expert take the worry out of heating and cooling maintenance. One simple phone call and your problem is solved!

## **SAVE MONEY**

When your system is properly maintained, it uses less energy, has less expensive repairs and lasts much longer. The lifetime savings for all of these benefits, outweigh the yearly expense of maintenance.

As the owners, of a small business, my philosophy has been steadfast. Focus in hiring and retaining the highest quality employees and allow them to do their job. Hardly a day passes when I don't receive a call complimenting me on our professional approach. Integrity is a necessary trait to survive in today's business climate.

We understand the importance of maintenance and provide qualified technicians to perform these tasks. We are so confident in the quality of our maintenance that we are willing to waive any diagnostic fee and discount the parts should an emergency arise. We also know that your energy bills can and will be reduced. Plus, no need to go to the phone book and risk calling someone you don't know.

We have made a point to involve ourselves in the community, using our time and energy to give back to those who support us. We are committed to treating each of our customers like neighbors. You can rest easy knowing that a competent support organization is prepared to solve your heating and cooling problems.

You've got my signature on it.
